*Gross density is based on the number of units divided by the size of the block, measured to the middle of the street on each side. Net density is based on the number of units divided by the lot sizes in the town records. Lot size and building coverage are also based on lot sizes from the town records. Please note: exact lot boundaries are not known for older neighborhoods, and there are discrepancies between the maps and the lot dimensions in town records.
PHOTOS OF BLOCK THREE

These photos show how homes have been added onto over the years to accommodate new units yet still retain the character of the neighborhood and provide housing options – single family, apartments and duplexes.
